Professional Experience

Software Architect, Hilton (Contract, Remote)

Aug '24 - May '26

Tech: Go, Gin, Kafka, Swagger, PostgreSQL

- Architected high-throughput microservice infrastructure serving millions of requests written in Go, reducing per-pod memory usage by 50%.
- Wrote and presented architecture proposals to management and fellow software staff, exhibiting use of decision matrices.
- Mentored early career developers while collaborating to ship features on schedule.

Backend Engineer, Silo Technologies (Remote)

Oct '23 - May '24

Tech: Go, GraphQL, AWS, Terraform, PostgreSQL, Kafka, Retool, Snyk

- Integrated freight coordination between transportation providers, customers, and shippers. Unlocked three (3) new types of customers.
- Integrated with Modern Treasury and Uber Freight, enabling the company to get off paper checks and accept ACH payments.
- Raced to complete prototypes in hackathon-type event, showcasing lead generation techniques and rapid development workflows.

Senior Software Engineer, Copia Automation (Remote)

Aug '21 - Jun '23

Tech: Kubernetes, Go, Typescript, React, Vite, Webpack, Vanilla JS, Swagger, PostgreSQL, C#

- Integrated Git LFS protocol into core product for all users, scaling the main product to reduce technical support calls and support dozens of new businesses.
- Achieved enterprise-ready status by directing core offerings (Visual + Tag Merge) to empower customers to resolve conflicts. Coordinated design and development.
- Enabled 12 new B2B customers to edit conflicts in their browser instead of notoriously slow vendor tools, speeding up their workflow by 3x.

Generalist Software Engineer, Commure (San Francisco, CA, USA)

Feb '20 - Jun '21

Tech: Kubernetes, React, Rust, WASM, Actix, Typescript, Nightwatch, Node.js, CockroachDB, RxJS, Snyk

- Built end-to-end solution for large hospital's intake flow. Processed patient billing details, medical history, etc.
- Led team on documentation portal overhaul project for new customer onboarding; enabled users to write applications integrated with our proprietary offering.
- Resolved dependency conflicts across all teams, unblocking compliance and security updates.

Senior Software Engineer, GM Cruise Automation (San Francisco, CA, USA)

Sep '18 - Oct '19

Tech: Kubernetes, React, Python + Pandas, Typescript, GraphQL, Go, BigQuery, Webpack

- Built a Jupyter-inspired collaboration platform, enabling Staff Data Scientists to easily track regressions and share insights with each other.
- Built tool to perform comparative analysis of self-driving car simulations on multiple branches, tracking error values and with automatic schema discovery.
- Produced pipeline to process failed runs and surface to leadership AV safety and performance as a top-line metric.

Software Engineer, Amplitude Analytics (San Francisco, CA, USA)

May '16 - Aug '18

Tech: React, Redux + sagas + redux-query, Python + tornado, Flow, GraphQL, PostgreSQL

- Enabled early company growth by building core features in crowded analytics space: redshift SQL editor, custom chart legends, custom cohort uploads.
- Hackathon-Winning Project (Time Travel) - shipped a time navigation feature to charts interface, reducing friction in a core data analysis workflow.
- Built a multiplayer collaboration feature (Team Spaces) to democratize chart creation. Increased chart engagement by 20%.

Volunteer Experience

"Hyper" Desktop Terminal Application, Quine Global

2024 - 2026

Tech: Claude Code, Codex, Grok AI, Github Actions, Docker, NixOS, Linux

- Secured, upgraded, and re-released a disused Electron desktop application using "vibe coding." Published 12 binaries per release. Collaborated with users.

"Riven (2025)" Published Game Credit, 59 Volt Entertainment

2008 - 2022

Tech: Blender, Maya, Unreal Engine, Unity, C++, Python (Flask, Twisted), C# / .NET, HLSL, Wordpress, Linux, Airtable, Oculus

- Recreated a classic 2D game using Unreal Engine, *Riven: The Sequel to Myst*, in realtime 3D. (Part of a larger team project.)

Education

Bachelor of Science in Computer Science, University of Florida

CLA C Certified Associate Programmer, C++ Institute
