Professional Experience

Software Architect, Hilton (Contract, Remote)

Aug '24 - May '26

Tech: Go, Gin, Kafka, Swagger, PostgreSQL

- Architected high-throughput microservice infrastructure serving millions of requests written in Go, reducing per-pod memory usage by 50%.
- Wrote and presented architecture proposals to management and fellow software staff, exhibiting use of decision matrices.
- Mentored early career developers while collaborating to ship features on schedule.

Software Engineer, Commure (San Francisco, CA, USA)

Feb '20 - Jun '21

Tech: FHIR, Kubernetes, React, Rust, WASM, Actix, Typescript, Nightwatch, Node.js, CockroachDB, RxJS, Snyk

- Built end-to-end solution for large hospital's intake flow. Processed patient billing details, medical history, etc.
- Team Lead - Coordinated portal overhaul project; unblocked new customers to write applications integrated with our healthcare platform.
- Resolved dependency conflicts across all teams, unblocking compliance and security updates.

Senior Software Engineer, GM Cruise Automation (San Francisco, CA, USA)

Sep '18 - Oct '19

Tech: Kubernetes, React, Python + Pandas, Typescript, GraphQL, Go, BigQuery, Webpack

- Built a Jupyter-inspired collaboration platform, enabling Staff Data Scientists to easily track regressions and share insights with each other.
- Built tool to perform comparative analysis of self-driving car simulations on multiple branches, tracking error values and with automatic schema discovery.
- Produced pipeline to process failed runs and surface to leadership AV safety and performance as a top-line metric.

Software Engineer, Amplitude Analytics (San Francisco, CA, USA)

May '16 - Aug '18

Tech: React, Redux + sagas + redux-query, Python + tornado, Flow, GraphQL, PostgreSQL

- Enabled early company growth by building core features in crowded analytics space: redshift SQL editor, custom chart legends, custom cohort uploads.
- Hackathon-Winning Project (Time Travel) - shipped a time navigation feature to charts interface, reducing friction in a core data analysis workflow.
- Built a multiplayer collaboration feature (Team Spaces) to democratize chart creation. Increased chart engagement by 20%.

Personal Projects

Various AI Projects ("Cold Air Networks", "Quine Hyper")

2024 - 2026

Tech: Claude Code, Vercel AI Gateway, Codex, Grok AI, Github Actions, Docker, NixOS, Linux

- Produced applications using OpenAI Whisper and Claude APIs – LLM-as-judge, constrained generation. Quick prototypes delivered to clients.
- Secured, upgraded, and released an Electron desktop application using Claude Code. Published 12 binaries per release, fielded users' bug reports.

"Riven (2025)" Published Game Credit, 59 Volt Entertainment

2008 - 2022

Tech: Blender, Maya, Unreal Engine, Unity, C++, Python (Flask, Twisted), C# / .NET, HLSL, Wordpress, Linux, Airtable, Oculus

- Recreated a classic 2D game using Unreal Engine, *Riven: The Sequel to Myst*, in realtime 3D. (Part of a larger team project.)

Education

Bachelor of Science in Computer Science, University of Florida

CLA C Certified Associate Programmer, C++ Institute
